

HEDI SCHAEFER

KEYNOTE SPEAKER |

HUMAN INTELLIGENCE, CHANGE & INNOVATION

Human Intelligence at Work™

Un(b)locking human potential for the future of work.

Why this matters now

AI is accelerating. Complexity is increasing. The future of work demands more than new technologies and strategies — it requires humans who can adapt, innovate, and lead themselves through constant change.

Hedi's Perspective

The biggest barriers to transformation are often invisible. Fear, outdated beliefs, overwhelm, and self-doubt can prevent people from accessing their full potential.

Hedi helps leaders and organizations un(b)lock the human capabilities needed to navigate uncertainty, create innovation, and shape the future with intention.

Keynote Topics

Human Intelligence at Work™

Unlocking the human advantage in the age of AI.

Why the future belongs to humans who can think deeper, adapt faster, create consciously, and lead themselves through constant change.

3Cs of Change™

Mastering transformation from the inside out.

How to move through uncertainty by creating clarity, releasing what holds you back, and designing what comes next.

Conscious Innovation™

Designing the future we want to live in.

How to challenge assumptions, unlock creative potential, and transform uncertainty into meaningful possibilities.
